	<p>1. Image registration via marginal distribution adaptation. IEEE Geoscience and Remote Sensing Letters 2021</p> <p>2. Multimodal image registration using histogram of oriented gradient distance and data-driven greedy optimization. Neurocomputing 2020</p> <p>3. Registration of multimodal remote sensing images using transfer optimization. IEEE Geoscience and Remote Sensing Letters 2020</p> <p>4. An optimizer ensemble algorithm and its application to image registration. Integrated Computer-Aided Engineering 2019</p> <p>5. An efficient particle swarm optimization for large-scale hardware/software co-design. International Journal of Cooperative Information Systems, 2018</p>
